

A Special Offer... Free WECARE!

Any customer of our full-service Internet Dependent Eligibility Audit will be entitled to an annual subscription to our

WECARE™ Internet Benefit Enrollment System

At absolutely **no additional cost** !

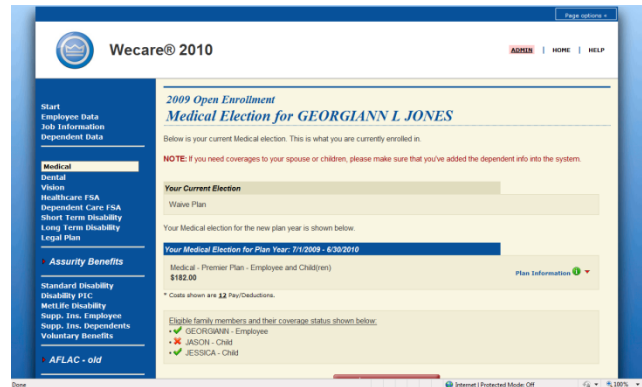

For one year, you can utilize our full-featured, complete on-line benefit enrollment system. You can use this not only for your annual open enrollment, but for any new hires as well during the plan year!

Your employees can self-enroll in their benefits during your annual open enrollment. Your new hires can also enroll on-line throughout the entire plan year.

This robust version includes your plans, rates and reporting for most all your benefit plans, including:

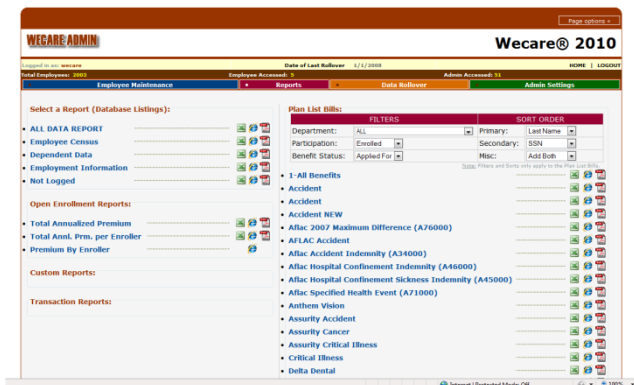

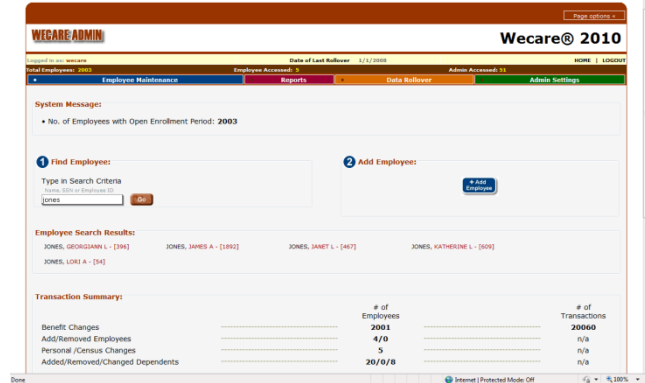

- Any number of Medical, Dental and/or Vision Plans – for any coverage tiers and plan variations.
- Your FSAs – both Medical and Dependent Care – with your specified plan maximums.
- Disability Plans – both Short and Long-Term plans based on percentage of pay and/or Buy-Up provisions.
- Term Life Plans – based on multiple of earnings or specified coverage options – for employee and family amounts.
- Voluntary Worksite Benefits – with our **unique direct on-line connections** to such providers as Aflac, Continental American, Texas Life, Unum and others.

Not only can these benefits be enrolled, but this benefit enrollment system includes edit and add functions for employee self-service of their **Personal and Dependent Data**. And finally, a complete and comprehensive **Benefit Election Summary** is prepared – both on-line for visual review, and as a “printer-friendly” version for the employee’s permanent record of their enrollment.

But the enrollment function is only half of the complete WECARE benefit enrollment system that we are offering. We also provide a **comprehensive Benefit Administrative Reporting system** that includes the following items:

- The ability to manage your entire employee population in whole or in part by use of strict user-based permissions. Each administrator can have access to specified employees by department or group.
- Complete and comprehensive reports for each benefit. These can be queried by benefit, enrollment status, and department – and sorted by various fields. Additionally, you can specify reports with or without specific data (like census and/or employment data).

- A Payroll Interface that enables you to update your WECARE system directly from payroll – and produce deduction reports back to your payroll system. This standard file interchange eliminates duplicate data entry processes.
- Additional features for terminating employees, tracking changes, and of course, managing and testing the eligibility of newly covered dependents.

The entire WECARE system as described above is provided to you for **one year at absolutely no cost or obligation**. We are providing this exclusively for our dependent audit clients.

Of course, if you would like additional options - including a year-round life-event management system, custom reporting or data links to carriers, systems or the like, we would be happy to quote that for you as well.
